

Encore HS1 Performance Headworn Mic System

The Encore HS1 is a modular performance head-worn mic designed for use with Sennheiser's ME105 super-cardioid capsule. This winning combination provides the optimal isolation needed for stage, broadcast and other live sound reinforcement applications. The Encore HS1 will also accommodate both ME102 (omni-directional) and ME104 (cardioid) Sennheiser capsules to suite different types of hands-free applications. The Encore HS1 gives the wearer complete freedom of movement while fully maintaining capsule position. Variants include versions with integrated cables that conveniently interface with Sennheiser's 3000, 5000 and EW wireless systems.

Features

- Fully adjustable telescopic headband
- Steel reinforced cable with right-angled plug
- Excellent feedback rejection due to close address distance
- Light brass tube construction provides high mechanical strength
- Versatile modular system provides cost-effective maintenance
- Available in Beige or Black, using either Lemo 3 or EW connectors
